# JOINS

A JOIN clause is used to combine rows from two or more tables, based on a related column between them.

TYPES OF JOINS

ORDERS   CUSTOMERS
INNER JOIN

ORDERS   CUSTOMERS
FULL JOIN

ORDERS   CUSTOMERS
LEFT JOIN

ORDERS
SELF JOIN

ORDERS   CUSTOMERS
RIGHT JOIN

BASIC SYNTAX:
SELECT ORDERS.OrderID, CUSTOMERS.CustomerName, ORDERS.OrderDate
FROM ORDERS INNER JOIN CUSTOMERS
ON ORDERS.CustomerID= CUSTOMERS.CustomerID
